Forecast for Wednesday 12 Jul 2023

Weather: Generally cloudy with a protracted period of rain first thing, perhaps punctuated by heavier downpours in places. Conditions will become somewhat drier and brighter later but it'll remain windy and on the cool side, accompanied by frequent showers. Some of these may be heavy and thundery during the afternoon, before slowly fading into the evening.

Chance of cloud-free hill tops above 600m: Near nil becoming 60%.

Low Cloud and visibility: Visibility poor at height initially, with extensive cloud down to 400 metres and perhaps to some western valley floors. This lifting and breaking through the morning to narrowly clear the highest ground by lunchtime. Visibility becoming good or pehaps very good at lower levels, but with the caveat of significant deterioration in showers, particularly at height.
